

# YOU THOUGHT IT COULDN'T GET BETTER?

Discover the **NEW AL-257**

## AL-257 ADVANTAGES

Newly designed hopper allows the rotor ports to be filled closer to capacity which translates into low pulsation and less rebound

AL-257 is more compact and less weight than the AL-252 yet has increased output

Hopper opens on hinge allowing for ease of maintenance

Rotor constructed of high tech aluminum for ease of removal

Steel on steel wear and rotor plates has shown up to 5 times less wear than traditional rubber gasket plates

Reduced overall height requires less headroom

With three rotor options, output varies from 0.7 - 9.6 cubic meters per hour
