

TERRABLAST WATER ATOMISER

Specifications

MODEL:	Single Blast (AM082)
MATERIAL:	Black PE Housing (FRAS)
NOZZLE SIZE:	8 mm (0.31 inch)
DIMENSIONS:	51 cm (20 inch) length x 20 cm (8 inch) diameter
WEIGHT:	3.2 KG (7 lb)

Description

The Terrablast Water Atomiser works by combining compressed air and water to create small water droplets that travel with the mine ventilation system, capturing airborne dust particles and causing them to fall with the water droplet.

The air and water are adjusted until the optimum water atomisation occurs. Terrablast Water Atomisers are set-up in locations where dust is commonly emitted, allowing for dust control at its source.

Warranty: This product is designed to meet the performance specifications outlined in this product data sheet. If the product is used in conditions for which it was not intended, or applied in a manner contrary to the written recommendations contained in the product data sheet, the product may not reach such performance specifications. The foregoing is in lieu of any other warranties, representations or conditions, expressed or implied, including, but not limited to, implied warranties or conditions of merchantable quality or fitness for particular purposes, and those arising by statute or otherwise in law or from a course of dealing or usage of trade.
